

Job Description
Research Associate

School-to-School International (STS) is a non-profit organization based in Pacifica, California that seeks to transform education and school health in developing countries so that every child can succeed in school. For over a decade, we have partnered with individuals, government ministries, non-governmental organizations, private foundations, and research institutions to improve the quality of children's learning through educational research and integrated support solutions for children in primary school. We currently have projects in 19 countries across the globe and provide assistance in assessment of student learning, program monitoring and evaluation, teacher training, and curriculum development.

Responsibilities:

- Lead the development of survey questionnaire(s) or other data collection instruments to meet project measurement and analytic needs, including leading in-country design workshops.
- Support data collection and lead data processing activities, including data cleaning.
- Create applications and syntax in software such as R, Stata, and SPSS, to process and analyze data.
- Provide technical support for data collection activities working closely with data collection staff to monitor data collection and carry out quality control (QC) activities.
- Assist with training data collection staff.
- Conduct workshops and trainings to build the capacity of evaluation and assessment specialists in host country governments and local organizations.
- Disseminate and discuss evaluation findings through written reports, articles, publications, and conference presentations, as needed.
- Prepare and submit reports as required, including monthly or quarterly project reports and trip reports.

Qualifications:

- Master's degree in international development, economics, statistics, research methods, political science, public policy, social science, or a related field, PhD preferred
- Experience with Early Grade Reading Assessment (EGRA)/Snapshot of School Management Effectiveness (SSME) development preferred
- Experience in the statistical analysis using statistical software such as R, Stata or SPSS
- Experience in data visualization
- Expertise in technical report writing required
- Demonstrated success and experience in monitoring results and indicators of education quality, learning outcomes, access, retention, and community engagement required
- Demonstrated leadership, versatility, and integrity
- Up to 25% travel required

Interested applicants should submit a CV and cover letter to info@sts-international.org using the subject line: "Research Associate."
