

Reading and Access Evaluation

Under STS's Reading and Access Evaluation subcontract, NORC issues Task Orders to provide specific technical assistance on impact evaluations of USAID education projects around the world. To date, STS has provided technical assistance to NORC on evaluations in Ethiopia, Liberia, Morocco, Uganda, and Zambia.

The specific scope of work on each evaluation's Task Order can be different. However, STS is typically responsible for overseeing the quality of and executing

- EGRA tool programming,
- Enumerator training,
- Data collection, and
- Preparing final EGRA data sets.

This technical assistance includes programming and uploading all assessments instruments to Tangerine, providing training to enumerators on EGRA protocols and processes, quality control oversight of EGRA data collection, cleaning of EGRA datasets, and basic analyses of EGRA datasets.

EXPERTISE AREA

Research and Evaluation

PARTNERS

NORC at The University Of Chicago
& USAID

COUNTRY OF WORK

Ethiopia, Liberia, Morocco,
Uganda, Zambia

TIMELINE

2013–2021
